

# Turn Rust Into Paint No Grinding Required

Strong adhesion

Good wear resistance

Multi-effect

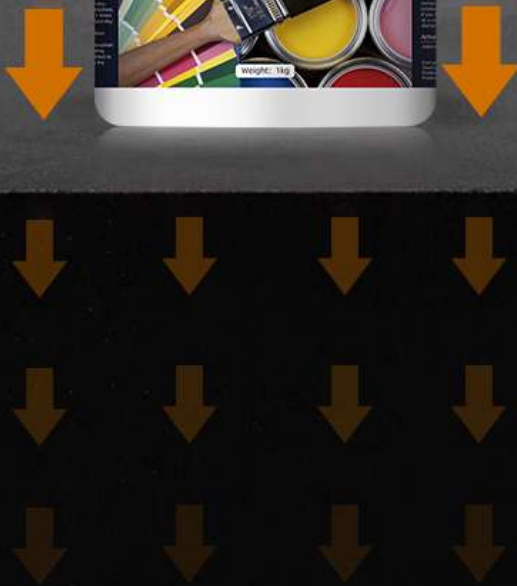

# Deep Penetration Transform More Thoroughly

Our converters are more permeable than normal  
converters rust removal is more thorough

## Osmotic transformation

### Xiguanjia Rust conversion agent

Deep penetration, the root will  
completely transform the rust, rust  
and corrosion protection life is longer

## Surface transformation

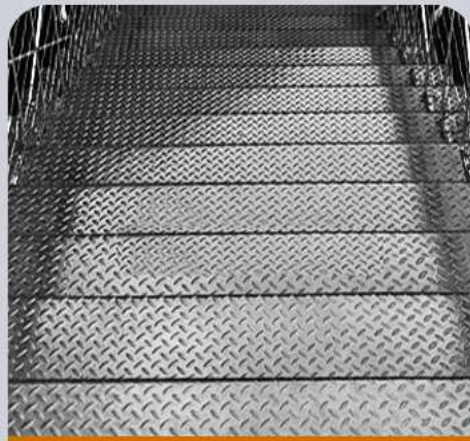

### Common rust conversion agent

Only on the surface of the rust  
conversion, a short time can not  
see the problem, the rust has  
not been cured for a long time  
easy to secondary rust

**Pre-construction**

**After construction**

**Pre-construction**

**After construction**

**Pre-construction**

**Pre-construction**

**After construction**

# Construction Procedure

No need to sand, save time and worry,  
rust removal is really simple

First step: clean the surface dirt

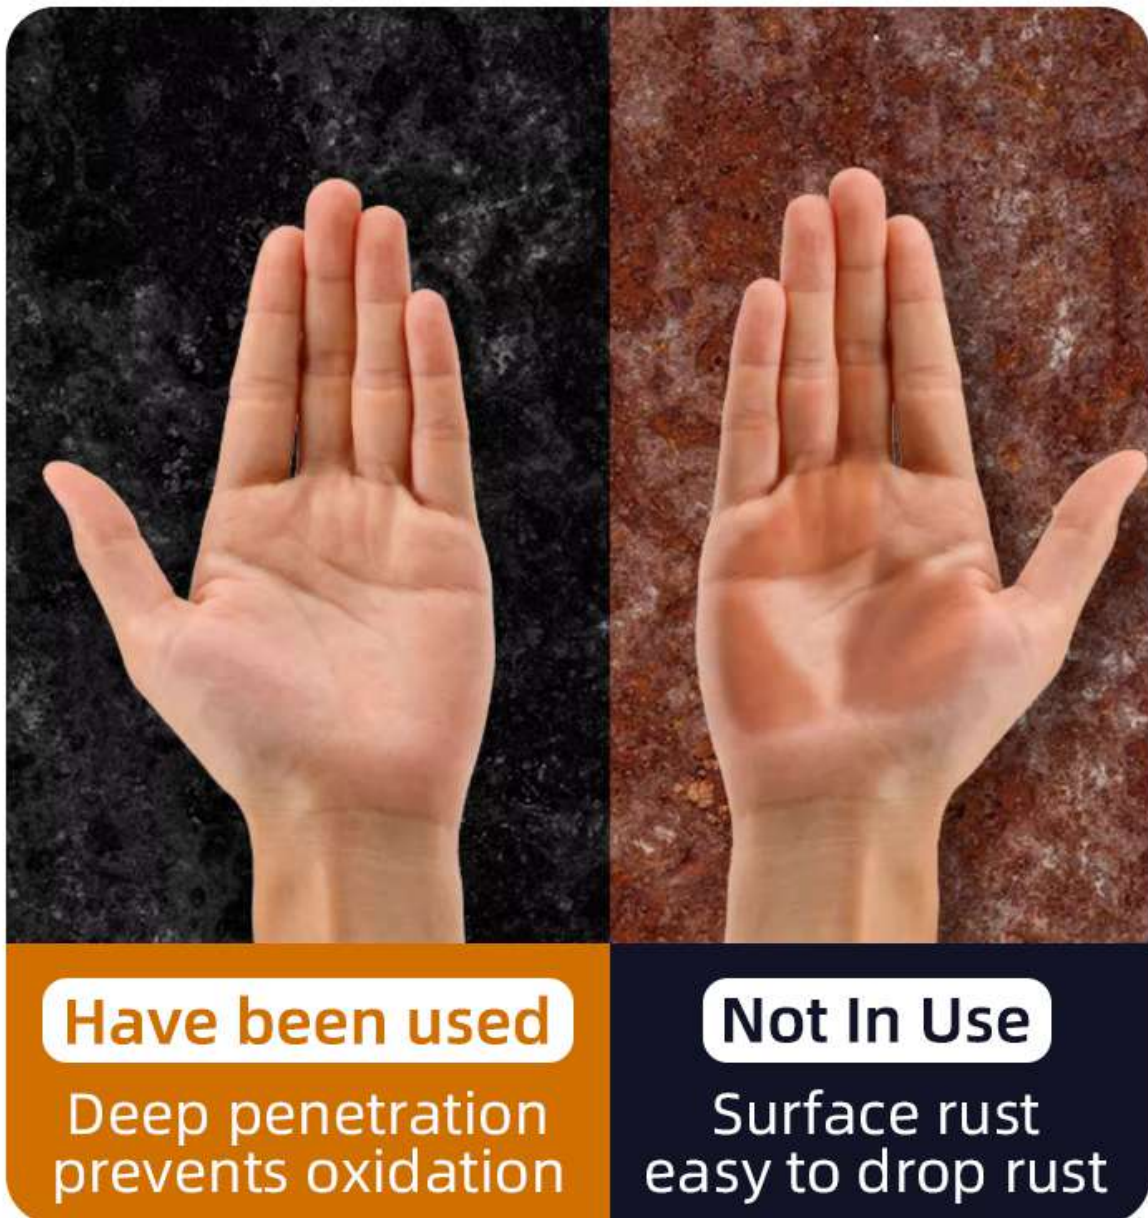

The second step: apply rust conversion agent evenly

The third step: wait for conversion to complete

# Removing Rust Is Better For Protecting Iron

Without the need to remove rust, it is directly applied to the rust surface and produces a combination reaction with the rust to produce an anti-rust protective coating

# No Grinding Direct Brushing

Both indoor and outdoor can be used  
with simple operation

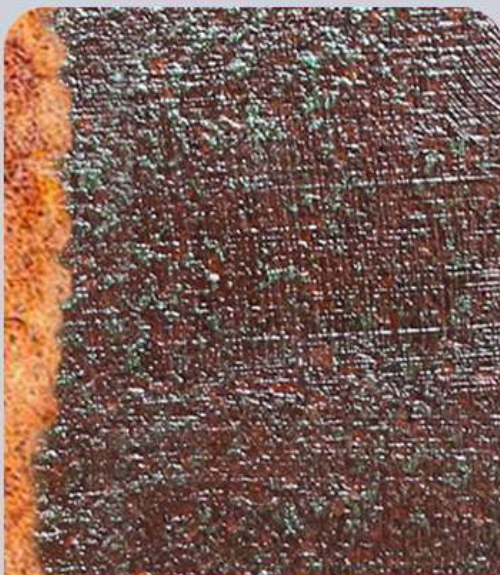

# Refuse The Cumbersome Rust Removal Process

A sweep and a brush can be done in two steps

**Our rust  
conversion agent**

Clean up the surface dust  
and oil

Direct brushing of  
products without sanding

**Traditional rust  
removal process**

Clean the surface dust, etc

Use a sander to clean the rust

Apply primer after sanding

Apply topcoat after primer dries

# Non-irritating Rest Assured To Renovate

Meet a number of testing standards,  
no irritating odor, indoor and outdoor use

No skin  
damage

Water-based  
formula

Safe and  
harmless

# Real Paint Effect

# Product Information

1kg

500g

## Product name

Rust conversion agent

## Product brand

Xiguanjia

## Specification

500g/1kg

## 保质期

18 months

## Construction method

Spray/brush/roll paint

## Brushing time

Surface dry 8 hours, dry 24 hours (actual drying according to the thickness); The base surface is seriously rusted. It is recommended to dry 24 hours before brushing it again

## Performance

Anticorrosion and rust prevention, tough film, strong adhesion, waterproof and mildew proof, flame retardant no odor, indoor and outdoor can be used

# Turn Rust Into Paint No Grinding Required

Strong adhesion

Good wear resistance

Multi-effect

# Wide Range Of Application

Color steel tile renovation, municipal steel structure engineering, steel structure bridge, steel structure plant, chemical pipeline and storage tank, iron plant renovation

Color steel tile  
refurbishment

Municipal steel  
structure engineering

Steel structure bridge

steel structure  
factory building

Chemical plant  
pipeline

Rusty stairs

# Powerful New Experience

Antiseptic  
and antirust

Multi-color  
option

Waterproof

Green  
security

Strong  
adhesion

Infiltration  
rust removal

# Have You Encountered Any Of These Problems?

High cost

Tedious process

Shorten life

# Rust Conversion Agent

## Rust removal finish 2 in 1

Xiguanjia rust conversion agent, let you easily remove rust, no worries

Xiguanjia  
Rust conversion agent

Other common  
conversion agents

VS

Shallow penetration  
Rust transformation  
superficiality

# Retrofit And Colour Change

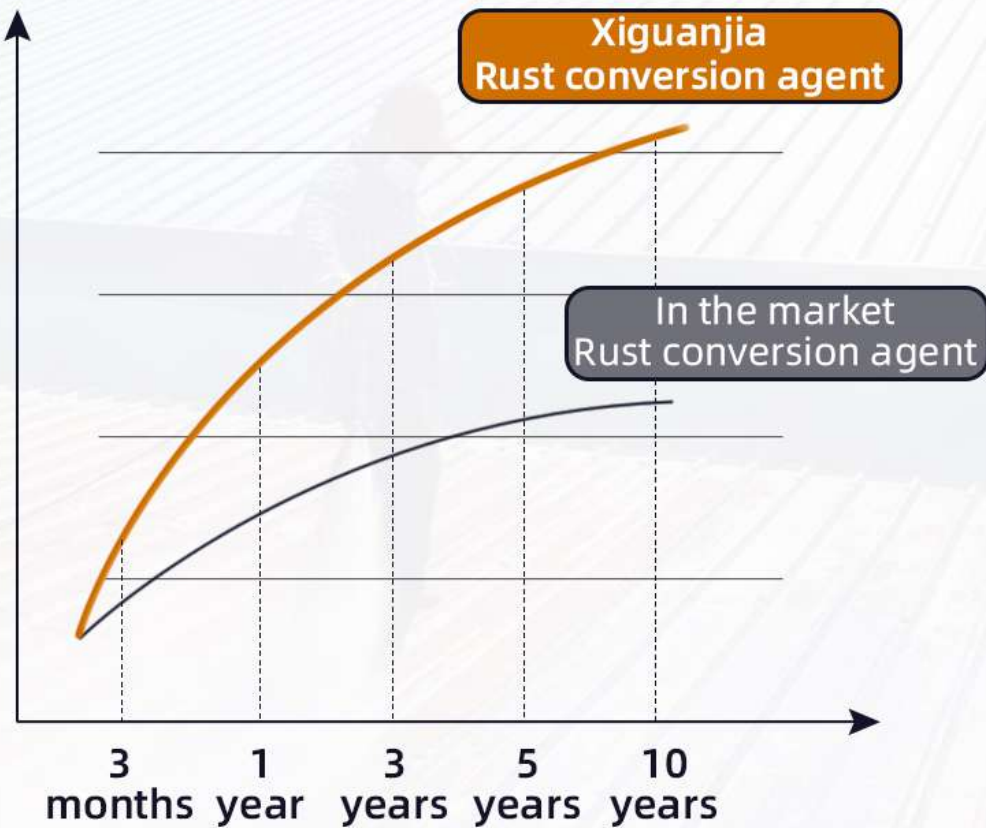

Durable beautiful, convenient construction  
isolation of water molecules in the air  
effectively prevent oxidation rust

**After  
rust transformation**

**Before  
rust transformation**

# New Formula Live Longer

**Xiguanjia rust conversion agent**

After several years of wind and rain, it is still as new and durable

**In the market rust conversion agent**

After a few months, it will rust again and again, and it is not durable

# Rust Removal Is The Bottom Line

The new formula of the rust conversion agent can go deeper to the bottom of the rust, without removing rust, directly on the rust surface, and react with the rust to produce anti-rust protective coating
